

## **cair.nz**

Writing

Thesis

This page is a standalone Typst publication.

metadata(none)

It proves the smallest publishing path: Typst source to intermediate HTML, transformed site HTML, and a unified PDF artifact.

Read the colophon.

The root note is local, and the foo note is in another publication.

## **Writing**

Writing owns posts explicitly, but it does not maintain an inherited publication index for them.

Read Foo.

## **Foo**

This post is public through Writing's anonymous ownership edge.

metadata(none)

Its own note stays local.

Return to Writing.

## **Thesis**

Chapter

Thesis maintains an inherited publication index for its child publications.

## **Chapter**

This chapter inherits both the site index and the Thesis index.

Return to Thesis.

## **Colophon**

This publication is owned with #entry, so it is public without becoming part of an inherited publication index.

Return to home.
